

Sr. Embedded Application Engineer

The software team at Phase One is seeking a clever, passionate and dedicated Senior Embedded Application Engineer to join the team.

So if you...

- Want to work doing bleeding-edge embedded software development, using the latest technology to develop photographic equipment for the most demanding imaging tasks in the world.
- Are interested in technologies like, power management, touch based user interfaces, high performance protocols, including USB3 and WiFi, and all sorts of sensors, e.g. 3d accelerometers, light measurements and temperature.
- See the challenge in working closely with amazing engineering colleagues towards setting the new standards for superior performance

–Then you may be the right person to expand our team.

We are a team of very skilled software developers, with a broad set of experiences, located in Copenhagen. We are not only responsible for developing cameras, but also for developing our embedded software platform, used in a number of different products in both the professional and industrial sectors. We are working in a very collaborative and agile environment, where open and honest discussion is an integral part of the way we solve complex problems. For new team members, we value higher the willingness to both share and learn new skills and to improve yourself.

About you:

- You have a MSc/BSc in engineering, computer science or similar.
- You have experience with Linux and Embedded Linux
- You have experience with programming applications for Embedded Linux
- You have a flair for programming – especially C++ and C.
- Knowledge about object oriented design.
- Knowledge about multithreading and parallel processing is an advantage
- You are eager to learn new disciplines and continuously improve.
- Fluent in English.

For this position we expect that you have at least 7+ years of relevant experience.

We're based in Copenhagen – and can't wait to meet you

You'll be working at our office in central Copenhagen where you'll have 100 ambitious, talented and experienced colleagues and many more throughout the organisation. Bringing together professionals from all over the world, we work in an international atmosphere of trust and empowerment and believe in getting things done without getting on each other's backs.

Application and further information

In this recruitment process, we are assisted by European Search Company. For additional information about the position, please contact Søren Rosenkrantz Larsen on +45 2893 7977 or Brian Ranvits on +45 2048 0548.

If you see yourself in the position and would like to be part of Phase One, please send your application by using the button below.

About Phase One

Based in Copenhagen Denmark and embracing the high demand of Scandinavian design excellence, Phase One is dedicated to delivering the best image quality and user experience. With offices in New York, Tokyo, Cologne, Shanghai and Tel Aviv, and with its expert teams of global partners, Phase One is committed to serving and supporting its customers worldwide.

Phase One's engineering and design expertise has produced imaging breakthroughs from high-resolution camera for professionals to industrial applications ranging from aerial image acquisition to cultural heritage preservation – from mapping the globe, to protecting priceless works of art and documents.
